

CHAIN HANGER

The Chain Hanger is the perfect mechanism for hanging artwork from a chain, whether you are seeking a Victorian look or some extra security, as used in the Lord Chancellors apartments, Palace of Westminster.

The Chain Hanger is simply secured to the back of the artwork using the two adjustable screw slots. The artwork is then suspended from the chains by simply hooking into the appropriate links. Once the picture frame is levelled and centred, the artwork is securely

'locked' in place by closure of the hook using the supplied captivated allen screw.

Small but strong: Our Chain Hangers follow the Absolute ethos of being well-designed, simple to install and as discreet as possible. The stainless steel construction means that a pair of Chain Hangers will safely support artworks up to 30kg in weight when installed using the appropriate fixings.

PRODUCT SPECIFICATION

Function	Artwork Hanger
Dimensions & loading	65mm in height, 11mm wide and 12mm deep. Hang artworks of up to 30kg.
Material	Stainless Steel
