

RYMAN HANGER

The Ryman Hanger is our most popular solution for hanging artworks and is used by an international body of galleries, large and small including the Tate galleries and MoMA.

Designed primarily to attach artworks tight to the wall with no visible fixings, they are easy to install, enable adjustment, and have a choice of three levels of security: Standard, Secure, and High Security. The latter two (Secure and High Security) incorporate the use of

our Ryman Spring Keepers, which, once in place, prevent the artwork from being removed without the appropriate tool.

The Ryman Hanger is sold in pairs and is available in three sizes, able to support artworks of up to 150kgs, and can be used when mounting artworks directly to the wall, onto our track systems or onto storage screens, when used in conjunction with our Storage Hooks.

PRODUCT SPECIFICATION - RYMAN HANGER

| | |
|----------------------|---|
